# High end finish, without the high end price

Our mission is simple. Our process refined.

With over 15 years of stone composite experience, we're in the business of creating innovative products & unmatched service. Combining high performance, lightweight stone, with our composite technology brings a new lightweight surface.

## Aerospace meets stone

We've combined high performing, lightweight sintered stone with our own aerospace composites, creating a highly versatile, affordable surface.

### Key Features

Description	Epoxy vacuum bonded aerospace composite with 4mm stone veneer
Panel Size (m)	3.2m x 1.4m
Thickness (mm)	25mm
Colours	24 (2 New arrivals ETA 2021) - Dekton 40 - Infinity
Textures	Polished, Matte, Velvet, Textured

### Thin Stone Veneer

Unlike traditional stone surfaces, we use thin veneers.

This brings a big boost in workability and reduction in weight!

Favos surfaces exhibit exceptional scratch, stain, heat & UV resistance.

### Aluminium Honeycomb

Our composite cores utilise a 20mm aluminium honeycomb, the same standard used in composite aircraft manufacture!

### Fibreglass & Epoxy Skin

The facing skins utilise a medium grade, woven fibreglass mesh bonded using a specially formulated epoxy system.

# Favos Details

Lightweight Worktop & Kitchenware

## Exceptional Performance

Favos worktops are incredibly tough, impervious to Stains, Scratches, Heat & UV Light

## Multifunction Sinks

Innovative multifunction sinks featuring layerable accessories improving the user experience

## Fitted Splashbacks

Cut to size splashbacks including socket cut outs. Created using 8mm thick material

## Stonemasons Joint

Traditional stonemasons joint aids installation ensuring a perfect fit

## Solid Closed Edge

Favos worktops feature closed edges, matching texture & colour of surface

# Simple Installation

No Specialist Required

Only  
15kg/m<sup>2</sup>

## Exceptional Strength & Handling

Favos surfaces arrive pre-manufactured to site as per templated drawings.

Our composite panels are exceptionally rigid & stable, so no longer are hob & sink cut-outs a liability!

Its low weight makes transporting panels up stairwells & tight spaces safer and easier.

## One-man Install

Stability & low weight allow for a one man installation. Special installation teams are no longer required.

## Easy to modify

Minor site alterations require no specialist tooling. Basic power tools can be used.

## Appliance Ready

Precut holes and factory installed fixings allow for quick installation of kitchenware & appliances.

# Artinox Sink Range

Multilayer Sink Technology

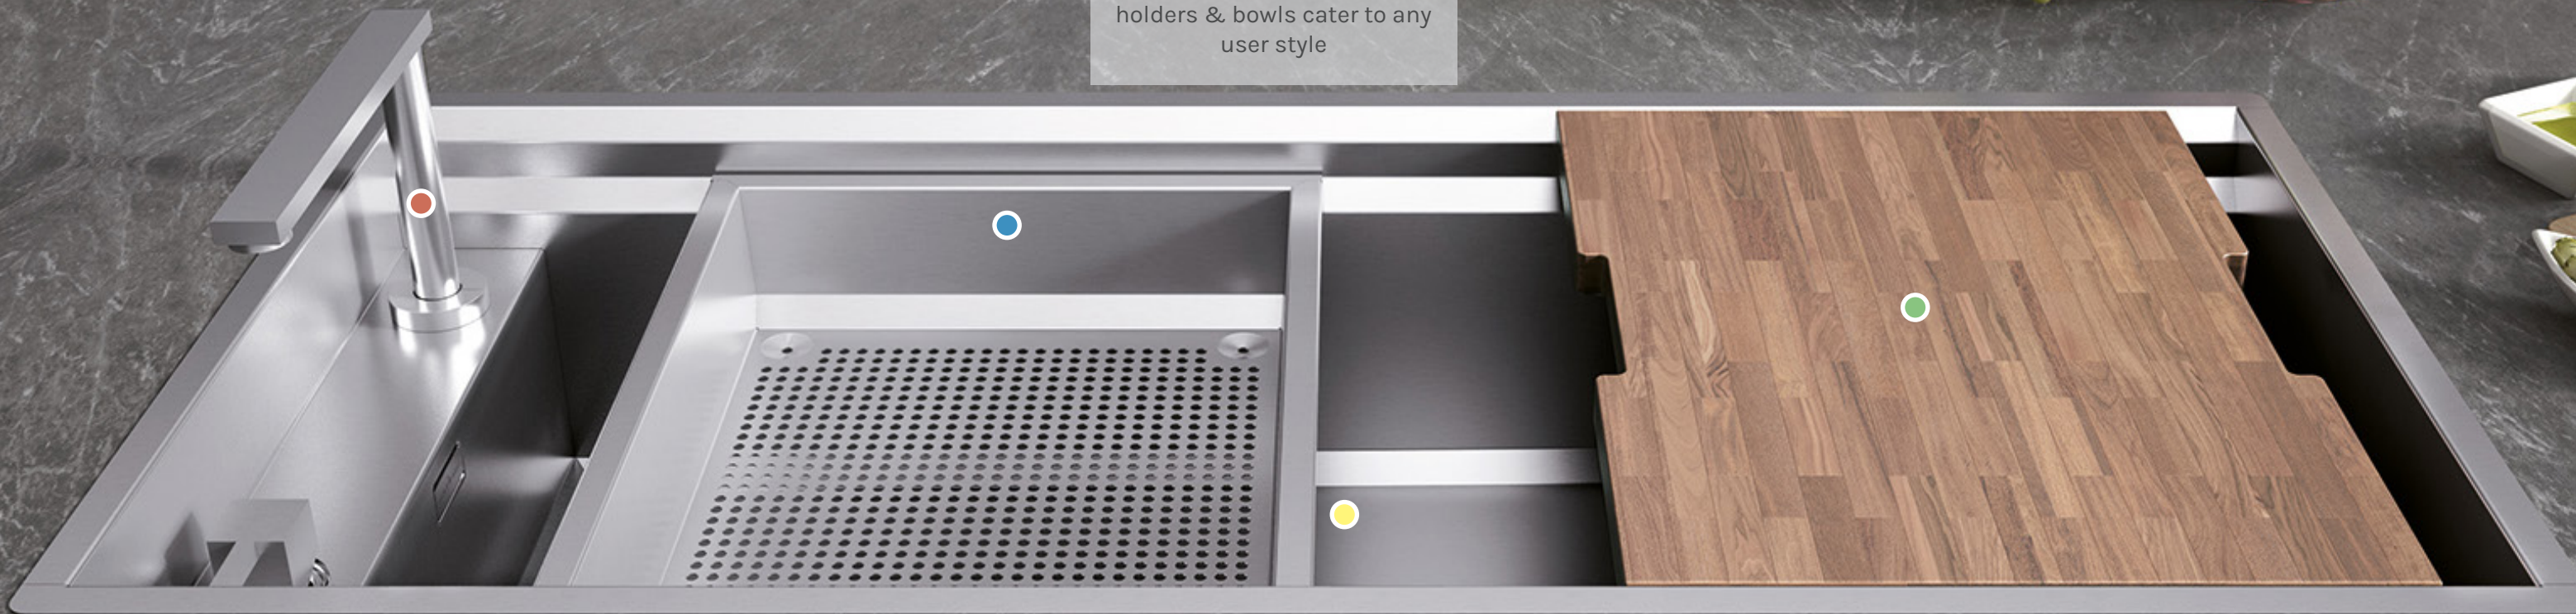

Favos has partnered with kitchenware manufacturer Artinox, in delivering the very best in Italian design & fabrication.

Featuring an innovative range of multifunctional sinks, Artinox has evolved the modern day sink. Available throughout the Artinox range are a variety of drainer, board, tray & tap solutions giving users the ability to match their process to their needs.

### Drainer & Bowl Range

A wide range of sink trays, holders & bowls cater to any user style

### Retractable Taps

Increase your worktop area with retractable taps & full length chopping boards

### 304 Stainless Steel

Artinox sinks are manufactured from 1mm high-grade 304 stainless steel

### Flush fit Chopping Boards

Available in high performing Iroko wood, glass, steel facing or polyethelene

# Artinox Sink Range

## *Bordolama Sink*

Exclusive to the Favos range, is an evolution of sink design, the Bordolama.

### Raised Steel Edge

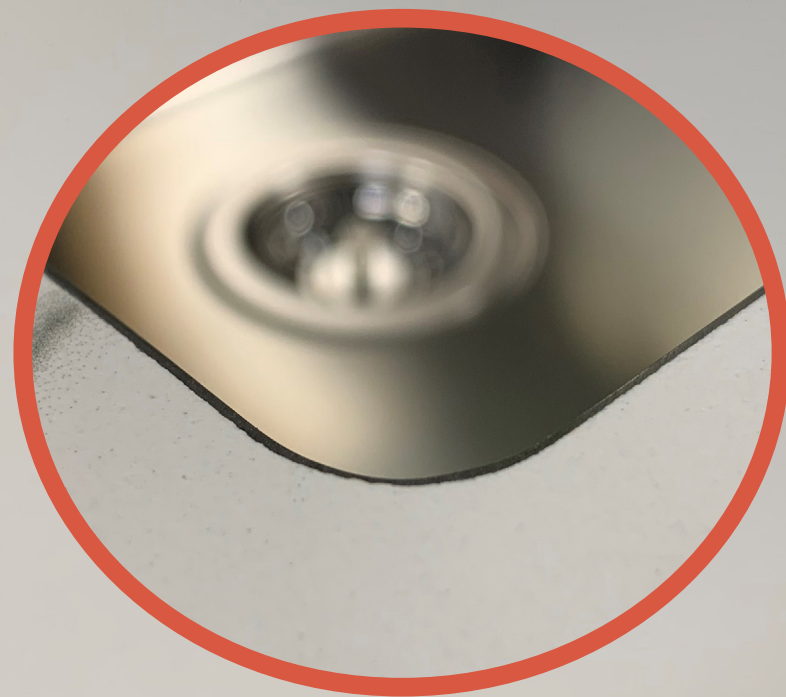

Unique in its design, it features a raised steel edge. This meets flush to the worktop surface ensuring a continuous surface. This creates a unique look that prevents any food residue build up.

### Edge Protection

Unlike undermount sinks. The stone edge is fully protected by the raised steel. This ensures worry free aftercare to knocks and chips!

### Simple to Install & Maintain

Pre-manufactured studs & cutout ensure a worry free installation, whilst offering an easy to maintain edge.
